Chapter 1 by Rinat Menyashev

Idea #1. Sterilize all people who start a political career on country-level (not everybody, just federal politicians). This is how we will get rid of all the dicks in governments. Male politicians won't have a high testosterone level and won't be very aggressive

Chapter 2 by intellikat

Idea #2. Replace all grass and treed areas with asphalt so that the shortest distance between you and your destination is always a straight line. This will see a predicted increase in efficiency of up to 143% for both pedestrians and motorists. Any individuals struck by a motorist due to this are considered an inevitable loss (no-fault), and survival of the fittest in this respect will promote a culling of the species and a strengthening of the larger genetic pool.

Chapter 3 by Luke Meyers

Idea #3. Randomly assign pen pals across the whole country. Levy heavy tax penalties on everyone who doesn't send a letter a week.

Chapter 4 by Joakim

Idea #4. Assign everyone with a pet at the age of 5.

Hypothesis:

Better understanding for animals == treat them better
